DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: Claim 1, lines 7- 8- said capacitor and said diode don't have a common node. Appropriate correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the push-pull-type, half-bridge type, full-bridge-type and resistor-capacitor-control type converter must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Qian et al. (6,314,002).

Qian et al. disclose a voltage clamping system and method for a DC/DC power converter in Figs. 4, 6 and 7. Transformer (T), input source voltage (Vin), charge inductor (Lin), a winding (N1) with an opposite polarity to said primary winding (N3), a diode (D1) coupled with said winding, a capacitor (Cd) coupled with said diode, wherein said capacitor and diode have a common node connected with said primary winding, an inductor (Lk) coupled with said diode; and a capacitor coupled with said inductor, wherein said capacitor and said inductor have a common node connected with said primary winding.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
